

Team 27 - TwitMap

Mapping trends geographically using data from social media.

IDEA

Utilizing the Twitter REST API to create a heatmap of user-selected trends/keywords. We hope to eventually utilize a crawler and AI to get more relevant results and even sort by sentiment.

Nels Anderson - Backend

Richard Au - Python backend

Nicholas Erokhin - Backend/Database

Graham Henry - Market Analysis, Infographic

Nicholas Osterfelt - Backend/Reporting

Lauren Raddatz - Frontend/UI Design
